UL Compounds
Certifiably perfect solutions.

High Performance Seals is pleased to offer these UL rubber compounds, all of which have been tested and recognized under Underwriters Laboratories’ Category JMLU2, “Gasket and Seal Materials – Components”. General information regarding the end use applications and physical properties of each compound is outlined inside this brochure.

To learn more about UL, an independent product safety testing and certification organization, please visit www.highperformanceseals.com/ul. For more specific information or expert advice, contact us and speak directly to an experienced compound professional. Please call us at 877.796.0123 or visit www.highperformanceseals.com.

HIGH PERFORMANCE SEALS’ UL LINEUP

O-RINGS & BACK-UP RINGS
We have a UL recognized compound O-Ring to match virtually every application you need – or we’ll customize it for special applications. We also offer extrusion-resistant back-up rings to ensure seal protection.

CUSTOM MOLDED SHAPES
When the need is for durable non-seal type molded parts made with UL recognized compounds, High Performance Seals can help. For bumpers, caps, gaskets, bellows, handles, washers, gaskets and more, we deliver the solution.

FABRIC REINFORCED DIAPHRAGMS
Diaphragms offer several benefits like no sliding and static friction, no need for lubrication, simple assembly and more. High Performance Seals offers UL recognized fabric reinforced diaphragms to meet these demands.

METAL-TO-RUBBER SHAPES
Seals come in all shapes and sizes for countless applications. Over our decades of experience, we’ve seen and sourced them all. We’ve got the metal-to-rubber seal and shape you need – and UL recognized.

UL recognized seals of approval.

Underwriter Laboratories is an independent product safety testing and certification organization. Its product recognition is a standard for virtually all industries and it’s your assurance of High Performance Seals’ tested and verified quality for the specified applications.

High Performance Seals offers a wide variety of UL recognized rubber compounds to match numerous different applications. Our selection of fluorinated and nitrile compounds meets the demands of several petroleum category applications from natural gas to diesel/biodiesel blends, plus other application categories such as ozone and rubber-to-metal bonding. All of our fluorocarbon compounds are formulated with genuine Chemours™Viton™ for high temperature and extremely corrosive environments. The EPDM compounds are recognized for extinguishing agents, detergents, ozone, swimming pool pumps and more.

For more information on UL compounds contact High Performance Seals. We can help you find the perfect UL compound for your application.
**FLT-7001: 75 DUROMETER FLUOROCARBON**
Chemours™ Viton™ GFLT is a premium APA grade of fluorocarbon material that offers the best all-round performance in terms of physical properties, low temperature sealing ability and chemical resistance. It can also be bonded to both metal and fabric.

**USE:** B, C, D, E, F, G, H, J, N, O, 1, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 25

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 200°C
- **Minimum Service Temperature:** -60°C
- **Hardness Range:** 75 - 85
- **Tensile Strength:** 2163 psi
- **Elongation:** 229%
- **Maximum Compensation Set:** 10.7%
- **Maximum Tensile Set:** 4%

---

**F-7041: 75 DUROMETER FLUOROCARBON**
This compound is based on Chemours™ Viton™ B polymer. Viton™ B offers improved chemical resistance over standard A grades at a lower cost than the GF or GFLT based Vitons™.

**USE:** B, C, D, F, G, H, J, 1, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 24, 25

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 200°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 74 - 84
- **Tensile Strength:** 1735 psi
- **Elongation:** 148%
- **Maximum Compensation Set:** 10.7%
- **Maximum Tensile Set:** 2%

---

**FS-7002: 75 DUROMETER FLUOROSILICONE**
This UL fluorosilicone provides exceptional sealing capability in extremely low service temperatures. Coupled with UL 50/50E electrical enclosures, it makes an excellent environmental seal due to its extreme cold temperature flexibility and resistance to both ozone and UV light.

**USE:** B, C, D, G, 3, 4, 5, 9, 10, 12, 14, 15, 25

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 80°C
- **Minimum Service Temperature:** -55°C
- **Hardness Range:** 63 - 73
- **Tensile Strength:** 1107 psi
- **Elong:** 215%
- **Maximum Comp Set:** 4.0%
- **Maximum Tensile Set:** 3%

---

**F-7027: 75 DUROMETER FLUOROCARBON**
This material is recognized for use in gasoline, gasoline/alcohol blends, kerosene, natural gas, LP gas and diesel fuel, as well as UL 50/50E electrical enclosures. It also exhibits a very low compression set. F-7027 is formulated from genuine Chemours™ Viton™.

**USE:** B, D, F, G, H, J, 3, 4, 5, 26

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 200°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 75 - 85
- **Tensile Strength:** 2278 psi
- **Elongation:** 201%
- **Maximum Compensation Set:** 4.3%
- **Maximum Tensile Set:** 4%

---

**F-7036: 75 DUROMETER FLUOROCARBON**
This is High Performance Seals’ standard stocked UL Viton™ A material. The compound offers numerous UL recognitions, primarily focused on the fuel dispensing market. As a member of the A family, it offers the best physical properties of the available Viton™ grades.

**USE:** B, C, D, F, G, H, J, N, 1, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 25

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 200°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 75 - 85
- **Tensile Strength:** 1970 psi
- **Elongation:** 180%
- **Maximum Compensation Set:** 4.3%
- **Maximum Tensile Set:** 2%

---

**F-7020: 75 DUROMETER FLUOROCARBON**
This compound is based on our F-7036 Viton™ material. However, it has been specifically formulated to facilitate bonding to various types of metals and plastics. This can reduce costs by allowing High Performance Seals to supply a complete seal, rather than relying on more expensive seal capture methods like dovetail grooves or chemical adhesives.

**USE:** B, D, E, F, G, H, J, N, O, 1, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 25, 26

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 200°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 76 - 86
- **Tensile Strength:** 1822 psi
- **Elongation:** 254%
- **Maximum Compensation Set:** 19%
- **Maximum Tensile Set:** 6%
**NITRILE COMPOUNDS**

**N-7026: 70 DUROMETER NITRILE**
This material is recognized for use in manufactured or natural gas, diesel fuel, and liquefied petroleum gas (LP gas). It’s also suitable for use in UL 262 appliances (gate valves for fire protection service).

**USE:** F, G, J, 2, 3

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 60°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 64 - 74
- **Tensile Strength:** 2548 psi
- **Elongation:** 326%
- **Maximum Compensation Set:** 11.6%
- **Maximum Tensile Set:** 3%

**N-7079: 70 DUROMETER NITRILE**
N-7079 is High Performance Seals’ original fuel-resistant UL nitrile. The compound’s high acrylonitrile content affords for good resistance to both fuels and oils.

**USE:** B, D, F, G, J, 1, 3, 4, 5, 6, 7, 8, 12, 14, 15, 25, 26, 27

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 60°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 69 - 79
- **Tensile Strength:** 1599 psi
- **Elongation:** 297%
- **Maximum Compensation Set:** 12.3%
- **Maximum Tensile Set:** 2%

**N-7088: 70 DUROMETER NITRILE**
This is High Performance Seals’ general purpose UL nitrile compound. With a normal acrylonitrile content, it is suitable for less aggressive fuels such as diesel and LP gas. It’s a more economical alternative for UL applications that don’t require gasoline resistance.

**USE:** B, C, D, F, G, J, 4, 5, 12, 14, 15, 20, 25

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 60°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 70 - 80
- **Tensile Strength:** 2350 psi
- **Elongation:** 166 psi
- **Maximum Compensation Set:** 10.8%
- **Maximum Tensile Set:** 3%

**N-7099: 70 DUROMETER NITRILE**
N-7099 compound is very similar to N-7088, however it offers additional UL recognized end uses for pumps and mechanical seals.

**USE:** E, F, G, J, 21, 22

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 60°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 69 - 79
- **Tensile Strength:** 2946 psi
- **Elongation:** 302%
- **Maximum Compensation Set:** 16.5%
- **Maximum Tensile Set:** 3%

**N-7575: 75 DUROMETER NITRILE**
Based on High Performance Seals’ N-7079 material, this compound offers several improvements over N-7079, most notably N-7575’s UL recognition for methanol/gasoline fuel blends.

**USE:** E, F, G, J, 21, 22

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 60°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 76 - 86
- **Tensile Strength:** 295 psi
- **Elongation:** 260%
- **Maximum Compensation Set:** 6.8%
- **Maximum Tensile Set:** 2%

**N-8002: 80 DUROMETER NITRILE**
N-8002 is recognized for use in manufactured or natural gas, diesel fuel, and liquefied petroleum gas (LP gas). It has a very good compression set and tensile strength.

**USE:** F, G, J, 3

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 60°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 76 - 86
- **Tensile Strength:** 2350 psi
- **Elongation:** 166 psi
- **Maximum Compensation Set:** 10.8%
- **Maximum Tensile Set:** 3%

**N-8007: 80 DUROMETER NITRILE**
N-8007 is very similar to the performance of N-7088, however this compound is 10 points harder in durometer. It’s excellent for bridging a 70 to 90 durometer gap, especially in terms of sealing capability and wear resistance. It’s also an excellent choice for a sealing seat.

**USE:** F, G, J, 3

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 60°C
- **Minimum Service Temperature:** -40°C
- **Hardness Range:** 75 - 85
- **Tensile Strength:** 295 psi
- **Elongation:** 148%
- **Maximum Compensation Set:** 8.3%
- **Maximum Tensile Set:** 0%

**EPDM COMPOUNDS**

**E-7049: 70 DUROMETER EPDM**
This specialty UL material features various unique end uses. Primary markets are pool and commercial/consumer dish-washing applications. Also, its UL 50/50E recognition could make it the right sealing gasket material choice for specialized applications.

**USE:** A, L, M, N, O, 4, 5, 18, 19

**UL Tested Physical Properties:**
- **Maximum Service Temperature:** 105°C
- **Minimum Service Temperature:** -50°C
- **Hardness Range:** 71 - 81
- **Tensile Strength:** 276 psi
- **Elongation:** 205%
- **Maximum Compensation Set:** 4.5%
- **Maximum Tensile Set:** 0%
The final acceptance of a gasket material in a specific end-use application is dependent on its installation and use, and may require additional evaluation with respect to ingress or leakage of solids (such as dusts), liquids or gases, or other features dependent on the design and construction of the equipment in which it is used.

LIMITED WARRANTY   High Performance Seals ("Seller") warrants that its products ("Goods") will perform in accordance with their specifications; that the goods will be free from manufacturing defects for a period of twelve (12) months from the date of delivery of the goods to Buyer; and that the goods will be as specified by Buyer in the purchase order. Seller should have the right to elect to either refund the purchase price for any defective goods or replace any defective goods, provided that the goods were used in the manner for which they were manufactured. Seller does not warrant that the goods are fit for any particular purpose. Seller should have no obligation to refund the purchase price or replace goods that are rendered defective by a Buyer or a third party after they leave Seller’s place of shipment.

LIMITED LIABILITY   Seller’s liability for its goods is limited to their terms set forth in Seller’s express warranty set for above, in no event shall Seller’s liability exceed the total purchase order price. Seller is not assuming any liability for any indirect, collateral, special, incidental or consequential losses or damages suffered by Buyer, or by any end-user or other third party, including but not limited to, lost profits, loss of business reputation and/or lost business opportunity, for any possible cause of action or claim arising out of or related to the goods sold to Buyer, even if Seller has been advised of the possibility of such loss or damage.
